

Natural Water Purification

UMH[®]

Umwelttechnologien

Prevents scale
Invigorates water

Your
source of life
for your home or business

- prevents scale from building up
- fosters vitality and well-being
- deletes harmful frequencies in tap water
- bestows life-giving energy on people, animals and plants
- reduces the amount of washing powder and chemicals required

UMH - quality that counts - scientifically proven

Bioresonance measurements pioneered by Dr Voll

Measurements at the meridian points on many people clearly show the **optimal benefits** of UMH water on the **functioning of all organs**.

UV, LF and HF measurements advocated by Dr Ludwig

Increased storage of UV light proves that the **water molecules** have a **strong structure**, corresponding to the quality of spring water. The deletion of harmful frequencies has been proved without a doubt by Dr Ludwig using scientifically proven measurement methods.

Exahertz measurement conceived by Dr Kohfink

Dr Kohfink confirms that the **process is absolutely stable**; even after several days it's just as strong. His results speak for themselves. The water ends up with the quality of pure spring water from the Rocky Mountains.

Structures in the water

The difference between biologically high quality water and the ordinary stuff is to be found in their **physical structure**, the arrangement of the molecules and the strength of their bonds. Disruption to these structures can be associated with illness.

Energetic diagnosis of extremities pioneered by Kirlian

The test subject's finger tips have **increased bioenergetic potential** which is immediately boosted after drinking UMH water.

Medicinal baths and hydrotherapy

A bath with UMH water bestows energy, improves skin problems and helps to **detoxify the body**.

Plants and animals

A more beautiful appearance and more **well-being** confirm the beneficial effects of UMH water.

Colorplate test by Dr Knapp

Only purified water has very distinctive bioenergetic potential. This **energizing effect** can still be **clearly measured** even after several days.

Improved plant growth

The College of Agriculture in Eisenstadt confirms that **increases in yield of 13.4%** on average were obtained for various types of tomatoes in several series of experiments.

Scale reduction in heat exchangers

Architect Dipl.-Ing. Ehrlich confirms that there were **no more scale deposits** after a one-year test period thanks to the change in water structure.

Change in surface tension

Significantly less washing powder and chemicals are required when surface tension is reduced by 10%. Dr Engler confirms that **minerals are processed better by the body**.

Studies carried out by Dr Kilibaeva

These results clearly show how the water is **rid of harmful microorganisms** after purification. Even the usual mother colonies are no longer present.
