

UMH Travel Filter Cartridge with Energy Treatment

The new UMH Tavel filter is an ideal travel companion for use in a caravan, on a boat or in a small house or flat.

It combines safe water filtration with guaranteed protection against germs.

The subsequent UMH energisation erases harmful information in the water, neutralises UV-treated water and restores the water's optimal, cell-compatible hexagonal structure.

No more lugging around crates or using plastic bottles. Ideal for when you're on the move. In a caravan or on a boat, the bottled water in the tank can therefore be used without any problems.

TECHNICAL DATA:

Design type:	Inline-Filterkartusche ILP Puro by Carbonit
Length in mm:	400
Outer diameter in mm:	80
Flow rate (litres per min.):	6 Liter
Installation position:	Horizontally or vertically, with a retaining clip
Connection:	3/8" connection nipple or with a 1/4-inch John Guest fitting
Water pressure:	max. 5 bar
